

Attention Utah Medicaid Pharmacy Providers

Utah Medicaid POS 72-hour override

When a medical emergency occurs for a medication that requires prior authorization, a pharmacy provider may dispense up to a 72-hour supply of the medication without obtaining prior authorization.

The pharmacy must submit prior authorization type code (461-EU) = 2 and prior authorization number submitted (462-EV) = 72.

The 72-hour override is limited to two per month per NDC per member. All copay and dispensing fee rules apply.
